

NEW

**SERIES III – AGRI LOADALL** | 532-60/532-70/536-95/538-60/542-70/560-80

Gross power: 81kW/109hp – 112kW/150hp (EURO Stage V)   Lift capacity: 3,200kg – 6,000kg   Lift height: 6.2m – 9.5m

## SERIES III **AGRI LOADALL**

Introducing the new Series III – AGRI Loadall, our new range of agricultural tractor homologated telescopic handlers.

Choose between the NEW AGRI with 109hp (81kW) the NEW AGRI Super with 130hp (97kW) and the top of the range AGRI Xtra with 150hp (112kW), all Stage V JCB engines and 40kph across the range.

Both the AGRI Super and AGRI Xtra models are available with JCBs DualTech Variable Transmission the world's first 2-in-1 transmission.

On top of being the world's No.1 with our industry-renowned fuel efficiency, hydraulics, drivetrain, safety features, structure, serviceability and increased productivity with greater lift performance across the range... our best cab ever.

SERIES III **AGRI LOADALL**

## OUR BEST CAB EVER.

OUR ALL-NEW COMMANDPLUS CAB PROVIDES OPERATORS WITH THE ULTIMATE DRIVING EXPERIENCE. WITH BEST-IN-CLASS CAB SPACE, NOISE LEVEL, ALL-ROUND VISIBILITY AND OUR COMMAND DRIVING POSITION, WE FIRMLY BELIEVE THAT A COMFORTABLE OPERATOR IS ALWAYS GOING TO BE MORE PRODUCTIVE.

### Best-in-class visibility.

**1** Visibility has never been better, with new seamless one-piece, multi curved glazing that increases front visibility by 14%, providing exceptional upward visibility when operating or loading overhead and excellent visibility beyond the dashboard when changing between attachments.

**2** The Command Driving Position, offers superior right hand side and rearward visibility over JCB's low boom pivot point, unique sloping bonnet design and low profile exhaust vent with the Stage V compliant engines internal exhaust canister.

With a 37% increase in wiped area, 92% of the front and roof window is covered. The simple to operate, single integrated roof and windscreen sun-blind, remains tight to the cab frame so not to intrude across the driver, providing unhindered machine operation.

### The ideal operator environment.

**3** The new CommandPlus cab offers a 10% increase in airflow performance and a 66% improvement in defrost time. Automatic temperature and climate control ensures that fresh or recirculated air keeps the operator at a comfortable temperature throughout the day.

**4** The optional half leather seat is heated and air-vented to ensure maximum comfort all year round.

Designed specifically for the agricultural industry, pressed panels and bespoke door seals ensure that noise within the cab is now 50% lower at an industry leading 69dBa.

With a cab volume increase of 12%, the new Series III AGRI Loadall offers a roomy environment for the operator. The new shaped cab ensures that the operator remains a comfortable distance from the curved front glass.

## OUR BEST CAB EVER.

### Closer control.

**1** For ergonomic, fast and precise control, AGRI Loadalls are fitted with a control pod affixed to the right hand arm rest, grouping all key operational buttons and the fully proportional single lever joystick together.

**2** A new adjustable, slim line, 7" screen with rotary controller allows for simple, clear access to operational information. There are multiple charge points and full connectivity by USB, 3.5mm audio auxiliary and Bluetooth through the radio, with an integrated microphone to aid hands free calling from your mobile phone.

**3** A new control pod mounted switch pack and rotary dial placement ensure that all important functional controls are close to hand and clearly visible to the operator.

### All in the detail.

**4** A 'set and forget' adjustable steering wheel enables the operator to revert automatically from stowed parked position to a preferred driving position.

**5** A 60% increase in storage gives you seven specific storage areas catering for items such as a removable storage bin, cup holder with external drain, net pocket and many more.

**6** With a courtesy light activated on door opening and illuminated lift charts, independently adjustable backlit brightness for screen and switch illumination, night time operation is made even simpler.

## OUR BEST PRODUCTIVITY.

DESIGNED TO MEET AGRICULTURAL DEMANDS, OUR LATEST AGRI LOADALLS OFFER INCREASED LIFTING PERFORMANCE ACROSS THE RANGE ALONG WITH UNPARALLELED PRODUCTIVITY, COURTESY OF SUPERLATIVE PERFORMANCE AND VERSATILITY. EXACTLY WHAT YOU'D EXPECT FROM THE WORLD'S NO. 1 TELEHANDLER MANUFACTURER.

### A revolutionary transmission.

**1** When it comes to productivity, the award winning DualTech Variable Transmission (DualTech VT) provides the best of Hydrostatic and Powershift gearboxes in one transmission, improving cycle times massively by up to 25% when handling and 16% when towing on the road, compared to competitor machines, this transmission is now available for both the AGRI Super and AGRI Xtra models.

### A productive machine.

**2** A JCB AGRI Loadall is extremely manoeuvrable; the 3 steer modes (2, 4 and crab), compact wheelbase and large steering lock angles save you valuable time on the farm, especially where space is limited.

**3** Four Wheel Drive (4WD) is standard, so traction is assured at all times. Two Wheel Drive (2WD) is available at the press of a button too, minimising tyre wear and fuel use when roading.

For improved performance on difficult terrain, opt for limited slip differential, standard on the AGRI Xtra.

Auto SmoothRide System (SRS) engages at speeds of over 2.5mph/4kph. This improves load retention and comfort (and, in turn, productivity) when travelling at speed on roads and fields. The system can be manually engaged with the boom in any position.

**4** Hydraulically controlled sway front axle leveling system enables precision loading on uneven ground.

**5** Joystick-mounted manual gear changes means you can shift gears, speed and direction quickly and easily with one simple control. DualTech VT and the 6 speed transmissions also benefit from automatic gear changes. The seat mounted joystick and control pod configuration gives great rough terrain performance.

**6** The auto-reversing fan, standard on all models, ensures that the engine pod remains clear from any unwanted debris.

**7** AGRI Loadalls are fitted with auxiliary spools as standard, ensuring they can be used with a wide range of attachments, for maximum versatility. The new Series III AGRI Loadall now boasts an internal and external pressure release button for the front and rear hydraulic auxiliary services too. A constant flow auxiliary is fitted as standard with twin auxiliary optional.

**8** High flow pipework gives greater flow to the boom, ideally suited to attachments demanding high flow such as silage defacers and straw spreaders.

**9** The JCB Q-Fit carriage makes attachment changing quick and easy. Choose from our extensive range of attachments to customise any machine for all applications.

6

JCB's auto bucket control patented technology makes it easier to meter out or fully empty material from your bucket or manure fork via a feature button on the joystick. Material is ejected quickly and in a controlled way.

A selectable transmission dump on the footbrake provides superb multi-functioning and increased engine speeds during loading or rehandling, whilst the DualTech VT offers hydrostatic inching capabilities through the brake pedal.

4

5

7

8

## OUR BEST FUEL EFFICIENCY.

WE'VE DESIGNED THE JCB AGRI LOADALL RANGE TO PROVIDE SUPREME EFFICIENCY DURING OWNERSHIP AND AGRICULTURAL OPERATION. ALL MACHINES OFFER SUPERIOR RETURN ON INVESTMENT WITH GREATER FUEL EFFICIENCY AND UNPARALLELED RESALE VALUE GUARANTEED.

### EcoMAX efficiency.

**1** JCB AGRI Loadalls are products of our Efficient Design Programme, the upshot of which is that you can expect best-in-class efficiency across the range.

**2** The 109hp (81kW), 130hp (97kW) and 150hp (112kW) JCB DieselMAX engines are fitted with a variable speed cooling fan that automatically reacts to ambient temperatures, adjusting fan speed to maximise fuel efficiency and reduce in cab noise levels.

**3** The new 7" floating display dash provides operators with useful information such as: ground speed, engine RPM, fluid levels (Diesel and AdBlue® or Diesel Exhaust Fluid), engine water temperature, engine hours. As well as efficiency information: fuel used since last fill, and current average fuel consumption figures.

2

1

There is only one real test for our industry-leading fuel economy – real life customers in real life applications. Over 2.5 million customer machine hours have been monitored to provide real life fuel consumption figures of only 5.97 litres per hour.

3

## Efficient by Design.

JCB Loadalls enjoy huge global demand due to legendary productivity, build quality and reliability, therefore resale/residual values have always been correspondingly strong.

**4** JCB's 4.8-litre DieselMAX engine uses a combination of next generation particulate control technology, using diesel oxidation catalysts (DOC), integrated DPF and selective catalytic reduction (SCR) to meet EU Stage V regulations.

**5** This new highly efficient, high torque engine offers cost of ownership benefits, with lower fuel consumption, extended service intervals and auto-stop technologies, as well as having ultra-low emissions.

Innovative regenerative hydraulics help to make the most of every drop of precious fuel. Gravitational forces are harnessed to make boom lowering and retraction more energy efficient than ever.

## OUR BEST STRUCTURES.

WE UNDERSTAND THAT AGRICULTURAL WORK CAN BE LONG AND HARD WHICH IS WHY OUR AGRI LOADALLS ARE BUILT TO BE AS TOUGH AS POSSIBLE, USING HIGH QUALITY COMPONENTS AND INNOVATIVE MANUFACTURING PROCESSES. THIS ENSURES YOU CAN EXPECT A LONG AND PRODUCTIVE SERVICE LIFE FROM YOUR MACHINE.

### Tough boom design.

**1** Ultimate strength and durability is assured with large boom overlaps of over 1m. Hydraulic hoses can be vulnerable to damage, so ours are intelligently routed through the boom for maximum protection.

The one-piece fully welded chassis maximises strength and minimises weight. For greater structural rigidity, the boom on an AGRI Loadall is mounted low in the chassis. This guarantees superior over-the-shoulder visibility.

### Built-in protection.

**2** Bonnets are protected from damage by being side-mounted and recessed.

**3** New frameless mirrors have been installed within the machine footprint significantly reducing potential damage whilst operating in tight, confined areas and improve the visibility around the machine.

**4** Heavy-duty axle feet help to absorb the immense stresses generated during continuous heavy loading.

External front and roof screen guards providing added protection from falling debris whilst lifting at height can be added as an option.

We've fitted a tough inverted U-shaped boom pressing with fully welded closing plates. For extra strength, we've reduced the number of joints and stress points across our integrated boom nose and one-piece closing plate.

## Durable components.

**6** The AGRI Loadall range's stringent testing programme has included cold climate testing, high stress loading of the chassis, boom and other key components, as well as repeated transmission use over thousands of typical agricultural work cycles, and prolonged use on our new rolling road facility.

The brand new CommandPlus cab has endured thousands of hours of testing involving door slam rigs, shaker rigs and extreme hot and cold climate conditions to ensure it can withstand the greatest of tests.

**7** The centrally mounted lift, tilt and extension rams eliminate boom twisting and are held in place by centrally-mounted keyhole castings for even greater structural integrity.

**8** At JCB, we make our own hydraulic cylinders, cabs, booms, chassis, axles, transmissions and engines – all designed to work in perfect harmony for optimum reliability.

To provide long-term protection, we dip every AGRI Loadall cab in electrophoretic alloy before painting it.

The Euro Stage V DieselMAX engines are built on the proven success of the JCB EcoMAX platform. Since the start of the engine programme we have achieved over 267,000 hours of testing across the toughest applications and environments.

## OUR BEST SAFETY FEATURES.

JCB AGRI LOADALLS ARE EQUIPPED WITH A NUMBER OF STRINGENT SAFETY MEASURES TO HELP GUARD AGAINST ACCIDENTS. THEY ALSO COME WITH A HIGH LEVEL OF SECURITY TECHNOLOGY INSTALLED FOR GREATER PEACE OF MIND.

### Better all-round protection.

**1** Aside from best-in-class visibility around the machine, LED front and rear cab, boom and hitch worklights optimise visibility at night or in other darkened operating areas.

**2** Our patented Adaptive Load Control System complies with EN15000 and allows the operator to drive seamlessly; without hindering productivity, whilst ensuring machine stability at all times.

The split door design allows for the operator to be more in tune with the environment around them. Communication is greatly improved when looking to communicate with banksmen or other farm workers.

**3** With up to 32 tonne towing capacity, the Series III Loadall features a twin line hydraulic trailer brake system as standard. A new fully tractor homologated pneumatic trailer braking option provides safer stopping capabilities.

### Safe access.

**4** Access in and out of the cab has been improved. Increased cab access area and swing-away grab handles ensure getting quickly and comfortably into position is safe and simple.

Accidental operation is a thing of the past with our operator presence switch; this feature prevents vehicle movement whenever drivers leave their seat.

1

2

The JCB factory-fit immobiliser system can either be activated by a unique key or integrated keypad PIN mechanism. The system automatically arms itself after a set time following engine shutdown.

3

4

Depending on territory, our Loadall security system is Thatcham-approved (3 Star). The package comprises a Cesar Datatag (on UK vehicles), a JCB LiveLink telematics vehicle tracker, and an immobiliser.

## OUR BEST SERVICEABILITY.

THE RIGOURS OF FARMING ARE SUCH THAT A TELEHANDLER NEEDS TO SPEND AS MUCH TIME AS POSSIBLE AT WORK, NOT BEING WORKED ON. THAT'S WHY JCB LOADALLS HAVE LONG SERVICE INTERVALS AND, WHEN MAINTENANCE DOES NEED TO BE CARRIED OUT, IT'S AN EASY AND QUICK PROCESS.

### Maintaining productivity.

**1** All daily checks and greasing can be carried out at ground level; our optional remote centralized greasing system makes for quicker and easier servicing.

**2** It's easy to fill both the diesel and AdBlue® / DEF tanks from ground level. The DEF tank has a built-in pre-filter in the filler necks to guard against dirt and contaminants plus separate keys to prevent cross contamination. The DEF tank also has quality sensors housed inside.

**3** The battery is protected by a hinged and bolted door for easy yet secure access.

**4** Every fluid filter (engine oil, hydraulic oil and fuel) is centrally located for fast, easy servicing. The air filter is easily accessed too, and its double-element design with cyclonic pre-filtering, simplifies cleaning.

**5** The separate cab air filter and recirculation filters are accessible when required, but tucked out the way to reduce dust intake, the recirculation mode stops any external air intake.

We equip all AGRI Loadalls with a large, wide service bay that's accessed via a gas-assisted bonnet. This setup allows fast and easy inspection around three sides of the engine.

# DRIVE THE REVOLUTION

## DUALTECH VT

### INTRODUCING THE WORLD'S FIRST AND ONLY 2 IN 1 TRANSMISSION (HYDROSTATIC AND POWERSHIFT), DESIGNED SPECIFICALLY FOR AGRICULTURAL TELEHANDLERS.

By combining the superior high-speed efficiency and towing ability of a JCB Powershift transmission with the low-speed control advantages of hydrostatic drive, JCB DualTech VT provides the best of both worlds for operators who want maximum efficiency and productivity across a wide range of applications.

Designed specifically for the agricultural industry, the DualTech VT offers a 25% productivity gain when handling and 16% when towing on the road, compared to competitor machines and is now available on both the AGRI Super and the new AGRI Xtra models.

#### Drive mode.

Fully automatic transmission from 0 to 40kph; harnessing the automatic changeover from hydrostatic to Powershift.

#### Auto 2/4 wheel drive.

Switching from 4WD to 2WD at speeds above 19kph and vice versa when moving down to lower speeds, for optimum efficiency and grip.

#### Eco/Power mode.

Select between Eco mode for smoother and quieter applications or Power mode for arduous conditions.

#### Power brakes.

Provide proportional braking throughout the pedal travel, with positional repeatability providing safe, stable stopping.

#### Flexi mode.

Provides independent engine speed and ground speed control.

#### Inching function.

Variably cuts off drive, through the first 30% of brake pedal travel, for intuitive multi-functioning during loading and rehandling.

### Hydrostatic drive.

**1** The hydrostatic drive module works in first gear to provide fast response, fine speed adjustment and infinitely variable working speeds up to 19kph through the accelerator pedal.

Flexi mode provides an additional drive mode when a relatively high engine speed is needed for rehandling or to maintain hydraulic oil flow to a powered attachment such as a straw spreader and feeder bucket.

### Powershift drive.

**2** When a Loadall fitted with the DualTech Variable Transmission's speed exceeds 19kph, whether in the field or on the road, the DualTech VT automatically switches to its Powershift system, using gears 2, 3 and 4 to shift smoothly up to a true 40kph speed.

Direct mechanical drive in 2nd – 4th gear, makes the most of available torque to deliver quick acceleration, strong towing ability and the impetus to maintain speed on road inclines.

# A REVOLUTION IN PRODUCTIVITY

## DUALTECH VT™

**WHEN IT COMES TO PRODUCTIVITY THE DUALTECH VT HAS AN ADVANCED POWERTRAIN THAT BRINGS TOGETHER THE PROVEN POWER AND TORQUE OF THE 4.8-LITRE, JCB DIESELMAX ENGINE WITH EITHER 130HP OR 150HP.**

The JCB Loadall features the full Smart Hydraulics package as standard, which combined with the DualTech VT, improves cycle times by up to 25% when handling and 16% when towing on the road, compared to competitor machines.

**1 Flexi Mode:** This enables the operator to use the throttle pedal as a speed controller whilst setting engine speed and maximum ground speed independently for maximised efficiency and ease of use when rehandling or to maintain constant flow for hydraulically demanding attachments.

**2 Power Mode:** This provides an extra boost for arduous applications and provides more responsive direction control, acceleration and deceleration. Perfect for when the jobs needs to be done fast.

**3 AUTO 2/4WD:** This feature will switch from 4WD to 2WD at speeds above 19kph and vice versa when moving down to lower speeds. 2WD is driven to the rear axles for better traction when towing.

# A REVOLUTION IN EFFICIENCY

## DUALTECH VT

THE JCB LOADALLS FITTED WITH THE DUALTECH VT CAN FULLY EXPLOIT THE POWER AND ECONOMY POTENTIAL OF THE JCB ENGINES. COMBINED WITH JCB SMART HYDRAULICS, A MASSIVE 15% REDUCTION IN THE AMOUNT OF FUEL BURNED TO MOVE THE SAME AMOUNT OF MATERIAL VS THE COMPETITION.

**1** Direct mechanical drive in gears 2-4, up to 40kph, reduces engine power losses through the transmission.

**2** ECO Mode: This allows the machine to use less engine revs and consequently less fuel with quieter running, during applications where the full power potential of the engine does not need to be utilised.

**3** Unique Smart Hydraulics makes the most out of every drop of precious fuel. Gravitational forces are harnessed to make boom lowering and retract more energy efficient.

# A REVOLUTIONARY DRIVING EXPERIENCE

## DUALTECH VT

**WHEN THE CAB IS YOUR OFFICE AND GREATER COMFORT AND CONTROL EQUALS GREATER PRODUCTIVITY, THE ULTIMATE TELEHANDLER HAS OF COURSE, THE ULTIMATE DRIVING QUALITIES. JCB AGRI LOADALLS FEATURE THE HIGHEST LEVELS OF COMFORT, EASY OPERATION AND CONTROLLABILITY YOU WILL FIND.**

DualTech VT gives smoother and easier operation with automatic gear changes all the way from 0 to 40kph and back down again.

**1** High spec cab for ultimate comfort and driving experience with fully adjustable suspension seat and steering column. Improved air flow, ventilation and demisting. Single-lever, seat mounted servo control with proportional auxiliaries are quick, easy and comfortable to use.

**2** DualTech VT reduces the need to use the brakes when rehandling. The power brakes also feature an inching function which variably cuts off drive for intuitive multi-functioning during loading and rehandling.

**3** AGRI XTRA models feature 11x LED work lighting package providing 360 degree illumination plus superior vision in low light. The LED package includes cab mounted work lights, boom lights, rear chassis lights, hitch light as well as interior light, plus the option of LED road lighting.

## ATTACHMENTS.

FROM FORKS AND SHOVELS TO SPECIALISED AGRICULTURAL ATTACHMENTS, OUR GENUINE JCB ATTACHMENTS RANGE CAN BE PERFECTLY MATCHED TO ANY APPLICATION.

### Shear grab.

Designed to cleanly cut grass and maize silage from the clamp, these units feature Hardox or forged tines, a heavily reinforced construction and powerful action. The serrated front blades are individually replaceable to minimise repair costs.

### Multishovels.

Intelligent design and rigorous testing has ensured that these multishovels are tough enough to withstand many hours of hard work. As part of the JCB extensive testing process our prototype units have been put to work on multiple UK and European working farms.

### Agricultural shovel.

High quality steel design with optional drilled toeplates to allow for additional bolt-on plates. Lightweight Domex material for maximum durability and productivity.

### Bucket brush.

High strength Domex steel means that our bucket brush range is both hard wearing and built to last. A versatile tool which can be used to sweep and collect a large variety of materials such as mud, grain, slurry, aggregate and equine waste.

### Powergrab.

The improved traditional tool for the stock farmer, these well-proven units are available in a range of sizes with options of forged or Hardox tines.

### Grain pusher.

Used to make optimum use of grain store capacity, the grain pusher has a 2286mm (90in) blade and uses a tubular frame for strength and minimum weight. Especially useful for operating over above-floor drying ducts. No flat surfaces allows free fall of grain.

### Grass forks.

Designed specifically for handling large volumes of grass for silage work, they feature a rear spill guard and hard wearing Hardox tines.

## LIVELINK, WORK SMARTER.

**LIVELINK IS AN INNOVATIVE SOFTWARE SYSTEM THAT LETS YOU MANAGE JCB MACHINES REMOTELY – ONLINE, BY EMAIL OR BY MOBILE PHONE. ACCESS EVERYTHING FROM MACHINE ALERTS TO FUEL REPORTS AND HISTORY INFORMATION, WITH ALL DATA STORED AT A SECURE CENTRE.**

### Maintenance benefits

Manage machine maintenance easily – accurate hours monitoring and service alerts including DPF soot level improve maintenance planning, while real-time location data helps you manage your fleet. Critical machine alerts and maintenance history records are also available.

### Productivity and cost benefits

By providing information like idle time monitoring and machine fuel consumption, JCB LiveLink helps reduce your fuel usage, saving money and improving productivity. Machine location information can help improve efficiency and even reduce insurance costs.

### Security benefits

LiveLink's real-time geofencing alerts tell you when machines move out of predetermined zones, like the farm yard and real-time curfew alerts inform you of unauthorised usage. Further benefits include real-time location information, advanced ECU matching (pairs LiveLink with the immobiliser or ECU).

## VALUE ADDED.

**JCB'S WORLDWIDE CUSTOMER SUPPORT IS FIRST CLASS. WHATEVER YOU NEED AND WHEREVER YOU ARE, WE'LL BE AVAILABLE QUICKLY AND EFFICIENTLY TO HELP MAKE SURE YOUR MACHINERY IS PERFORMING TO ITS FULL POTENTIAL.**

1

**1** Our Technical Support Service provides instant access to factory expertise, day or night, while our Finance and Insurance teams are always on hand to provide fast, flexible, competitive quotes.

**2** The global network of JCB Parts Centres is another model of efficiency; with 18 regional bases, we can deliver around 95% of all parts anywhere in the world within 24 hours. Our genuine JCB parts are designed to work in perfect harmony with your machine for optimum performance and productivity.

2

**3** JCB offers comprehensive extended warranties as well as service-only or repair and maintenance contracts. Irrespective of what you opt for, our maintenance teams around the world charge competitive labour rates, and offer non-obligation quotations as well as fast, efficient insurance repair work.

3

*Note: JCB LIVELINK and JCB extended warranties may not be available in your region, so please check with your local dealer.*
